EASTWOOD HARRIS PTY LTD.

### Course Agenda

**Day 2 Modules**

- 12 Filters
- 13 Tables and Grouping Tasks
- 14 Views and Details
- 15 Printing and Reports
- 16 Tracking Progress
- 17 Creating Resources and Costs
- 18 Assigning Resources and Costs to Tasks
- 19 Resource Optimization
- 20 Updating Projects with Resources.

Page 7

7

7

EASTWOOD HARRIS PTY LTD.

### Understanding the Workshops

- There are comprehensive workshops at the end of most modules to enable students to practice the skills taught in the module,
- The student workshops are at the end of each chapter in the Eastwood Harris Microsoft Project books and you are welcome to buy a paper or eBook copy, links at [www.eh.com.au](http://www.eh.com.au),
- You do not need to purchase a book and you may download a pdf extract of the book from this web site which includes all the workshops directions,
- The course include the downloading of a Microsoft Project Quick Access toolbar. If you start halfway through the course you should download this toolbar and import it, this topic is covered in the first workshop,
- You may download and import the completed workshops if you wish to start halfway through the workshops or wish to check your answers.

Page 10

Copyright Eastwood Harris Pty Ltd 2022

10

10

EASTWOOD HARRIS PTY LTD.

### Downloading Workshop Files

- The workshop files and Quick access toolbar may be download from this web site or [www.eh.com.au](http://www.eh.com.au),
- The completed workshops are a ZIP file that will require unzipping before importing into Microsoft Project,
- A simple method of unzipping the files is to double click on the ZIP file to open it and then click and drag the files inside the ZIP file to your desktop,
- These ZIP files contain all the completed workshops which may be imported into PC,
- Detailed instructions are given at the appropriate place in the workshops.

Page 11

EASTWOOD HARRIS PTY LTD.

### Module 1 – Introduction

Topics:

- Purpose of the course
- Required Background Knowledge
- Purpose of Planning
- Project Planning Metrics
- Planning Cycle
- Levels of Planning
- Monitoring and Controlling a Project.

Page 12

Copyright Eastwood Harris Pty Ltd 2022

12

12

EASTWOOD HARRIS PTY LTD.

### 1.1 - Purpose of the course

- The purpose of this course is to provide you with a method for planning and controlling projects using Microsoft Office Project 2021 or 365 and earlier versions,
- This book does not cover Microsoft Project Online
- In a single project environment,
- Up to an intermediate level.

Page 13

Copyright Eastwood Harris Pty Ltd 2022

13

13

EASTWOOD HARRIS PTY LTD.

### 1.2 - Required Background Knowledge

- The ability to use a personal computer and understand the fundamentals of the operating system,
- Experience using application software such as Microsoft Office, and
- An understanding of how projects are managed, such as the processes that take place over the lifetime of a project.

Page 14

Copyright Eastwood Harris Pty Ltd 2022

14

14

EASTWOODHARRISPTY LTD.

### Module 2 – Creating a Project Plan Summary

Topics:

- Understanding Planning and Scheduling Software
- Understanding Your Project
- Level 1 – Planning without Resources
- Level 2 – Tracking Progress without Resources
- Level 3 – Planning with Resources
- Level 4 – Tracking Progress of a Resourced Schedule.

Page 51

Copyright Eastwood Harris Pty Ltd 2022

51

EASTWOODHARRISPTY LTD.

### Module 3 - Navigation and Setting the Options

Topics:

- Starting Microsoft Project Professional and Standard
- Identify the Parts of the Project Screen
- Customizing the Screen
- Microsoft Project Windows
- Status Bar
- Forms Available from the Ribbon Groups
- Right-clicking with the Mouse
- Finding the Task Bars in the Gantt Chart
- Setting up the Options
- Mouse Pointers

Page 52

Continued.....

52

EASTWOODHARRISPTY LTD.

### Module 3 - Navigation and Setting the Options (Cont.)

- Select All button
- Short Cut Keys
- Help – Tell me what to do
- Workshop 1 – Navigation and Setting Your Project Options

Page 53

Copyright Eastwood Harris Pty Ltd 2022

53

EASTWOODHARRISPTY LTD.

### 3.1 Starting Microsoft Project

- When you start Microsoft Project for the first time and/or after going through the licensing process you may be shown a screen like the one below with a project file created,
- Project 1** is created from the **Global.mpt** template and it is recommended that that this template is not used and this file closed and not used,
- you are recommended to use the Eastwood Harris template available from [www.e.h.com.au](http://www.e.h.com.au).

Page 54

54

EASTWOODHARRISPTY LTD.

### 3.1 Creating a Project

To Create a new project you may:

- Create a **Blank Project**, which utilizes your system **Global.mpt** template,
- Creating a project from a **Personal** template, which requires the template directory set before these may be used
- Copy an existing project
- Import data from an **Excel** spreadsheet,
- Import a task list from **SharePoint**,
- Create a project from one of the Microsoft templates,

Page 55

55

EASTWOODHARRISPTY LTD.

### 3.1 Opening a Project

The Open screen has options to open:

- Recent Projects**,
- Open a project from **OneDrive**,
- This PC**,
- Add a Place** allows you to map other locations for quicker access to where your files are stored.
- Browse** allow you to browse the PC or a network.

Page 56

56

EASTWOODHARRISPTY LTD.

### 4.1 - Starting Microsoft Project

When opening Microsoft Project the **File, Options, General, Start up options** the **Show the Start screen when this application starts** check box determines if a **Blank Project** is created,  
**NOTE:** it is recommended that this option is not checked and a project is created from a template.

There are three principal methods of creating a new project:

- Create a **Blank Project** from the **Global.mpt** template, this template is part of your system, or
- Create a project from a user template that contains default data and formats.  
**NOTE:** This will require you to set the Save template directory in your **Options** for this function to operate,
- Copy an existing project, say by using the **File, New, New from existing project** option or opening an existing project and save it with a new file name.

Page 75

Copyright Eastwood Harris Pty Ltd 2022

75

EASTWOODHARRISPTY LTD.

### 4.2 - Creating a Blank Project from the Global.mpt – NOT RECOMENDED

- A blank project created from the **Global.mpt** may be created by:
  - Selecting **File, New**, and click on the **Blank Project** picture, or
  - Keying in **Ctrl+N** and depending on your **Options** you may be presented with the **Project Options** form to enter the **Project Start** date.
- The new project will display the project name in the top of the screen,
- At this point the **Project Start** date is normally set in the **Project Information** form, this may displayed automatically depending on your **Project Options, Advanced, General**, setting.
- Other dates in the Project Information form are:
  - Current Date:** – This field defaults to today's date,
  - Status Date:** – This is an optional field used when updating a project,
  - Calendar:** – This is the project Base calendar that is used to calculate the durations of all tasks.

Page 76

Copyright Eastwood Harris Pty Ltd 2022

76

EASTWOODHARRISPTY LTD.

### Understanding the Global.mpt

The **Global.mpt** template is used to create a **Blank Project**:

- The **Global.mpt** is a template that resides on your machine,
- It adopts the **All New Project** options set **File, Options** are editing the **Global.mpt**,
- The **Global.mpt** contents such as filters and calendars are be edited using the **Organizer** command,
- The **Global.mpt** options are **ONLY** adopted by a project created using the **File, New** command and selecting **Blank Project**, or typing **Ctrl+N**,
- When a project is created using a template or copying another project then the new project does not adopt **Options** set **File, Options** set for **All Projects**. These projects copy the options that reside in the template or project,

There are many issues with the **Global.mpt** and it is recommended that it is never used, the instructor will demonstrate.

Page 77

Copyright Eastwood Harris Pty Ltd 2022

77

EASTWOODHARRISPTY LTD.

### Understanding the Global.mpt

There are many issues with the **Global.mpt**

- The **Schedule Options** are not ideal
- The headers and footers have poor formatting and display many irrelevant bars,
- The bar formatting is poor without a negative float bar,
- There is only one Gant Chart View,
- It is not clear if a **Manually Scheduled** task has been created which will stop the software calculating.
- Thus, it is strongly recommended that the **File New, Blank Project** command is never used to create a project and you should always use a good template.
- The Eastwood Harris Microsoft Project template has all the issues with the **Global.mpt** resolved is a good start that may be edited to suit your organization's requirements.

Page 78

Copyright Eastwood Harris Pty Ltd 2022

78

EASTWOODHARRISPTY LTD.

### 4.3 - Opening an Existing Project

- To open an existing project you should display the **Open** form by selecting:
  - File, Open**, or
  - Typing **Ctrl+O**,
  - Using the **Find File** button.

Page 79

Copyright Eastwood Harris Pty Ltd 2022

79

EASTWOODHARRISPTY LTD.

### 4.4 Re-opening a Project

- Selecting **File, Recent** will show a list of recently opened project files.

Page 80

Copyright Eastwood Harris Pty Ltd 2022

80

EASTWOOD HARRIS PTY LTD.

### 6.10 - Elapsed Duration

- A task may be assigned an Elapsed duration and the task will ignore all calendars and the task will take place 24 hours a day and 7 days per week,
- This is useful for tasks such as curing concrete,
- To assign an elapsed duration type an "e" between the duration and units to enter an elapsed duration. The example below shows the difference between a 7-Elapsed Day task and a 7-day task on a Standard (5-day per week) calendar.

Task Name	Duration	Start	Finish	01 Sep	02 Sep									
				S	M	T	W	T	F	S	S	M	T	W
7 day task with elapsed duration	7 e days	01 Sep 08:00	08 Sep 08:00											
7 day task	7 days	01 Sep 08:00	08 Sep 17:00											

Page 111

Copyright Eastwood Harris Pty Ltd 2022

111

EASTWOOD HARRIS PTY LTD.

### 6.11 - Indicators Column

- The Indicators column will display icons in the column when a task contains a non-default setting such as a Note, Constraint, or a Task calendar,
- Placing the mouse over the icon will display information about the task:

	Task Name
1	This task has a 'Start No Earlier Than' constraint on Dec 12 '24. Notes: 'This is a Note.' The calendar '6 Day Week' is assigned to the task.

Page 112

Copyright Eastwood Harris Pty Ltd 2022

112

EASTWOOD HARRIS PTY LTD.

### 6.12 - Assigning Calendars to Tasks

- Tasks often require a different calendar from the Project Calendar and Microsoft Project allows each task to be assigned a unique calendar,
- A Task Calendar may be assigned by:
  - Using the **Task Information** form, **Advanced** tab, or
  - Displaying the **Task Calendar** column.

Task Name	Task Calendar
7 Obtain Quotes from Suppliers	None
8 Calculate the Bid Estimate	6 Day Week
9 Create the Project Schedule	6 Day Week
10 Review the Delivery Plan	None

Page 113

Copyright Eastwood Harris Pty Ltd 2022

113

EASTWOOD HARRIS PTY LTD.

### Module 6 – Adding Tasks - Summary

Topics:

- Understanding Tasks
- Adding New Tasks
- Understanding Change Highlight
- Copying and Pasting Tasks
- Milestones
- Reordering Tasks by Dragging
- Sorting Tasks
- Task Information Form
- Elapsed Durations
- Indicators Column
- Assigning Calendars to Tasks
- Workshop 4 - Adding Tasks.

Page 114

Copyright Eastwood Harris Pty Ltd 2022

114

EASTWOOD HARRIS PTY LTD.

### 6.13 - Workshop 4 - Adding Tasks

- We will add the tasks for this project and then add the WBS in the next workshop.

Page 115

Copyright Eastwood Harris Pty Ltd 2022

115

EASTWOOD HARRIS PTY LTD.

### Module 7 – Organising Tasks Using Outlining

Topics:

- Understanding Outlining
- Creating an Outline
- Promoting and Demoting Tasks
- Summary Task Duration Calculation
- Summarizing Tasks
- Project Summary Task
- Workshop 5 - Entering Summary Tasks.

Page 116

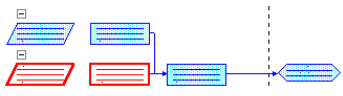

Copyright Eastwood Harris Pty Ltd 2022

116

EASTWOODHARRISPTY LTD.

### 10.1 - Understanding the Network Diagram View

- Summary tasks, Detail tasks and Milestones are normally formatted with a different shape,
- Typical shape examples are provided as follows:
  - Summary tasks are trapezoidal
  - Detail tasks are rectangular
  - The Milestone Task is an elongated diamond:

Page 153Copyright Eastwood Harris Pty Ltd 2022

153

EASTWOODHARRISPTY LTD.

### 10.2 - Adding and Deleting Tasks in the Network Diagram View

- A New Task may be created with a Finish-to-Start relationship by dragging from the center of a Task Box into a blank part of the screen,
- A New Task may be created without a relationship below the tasks position in the Gantt Chart by:
  - Using the Insert Key, or
  - Selecting Task, Insert group, Task, New Task button.

Page 154Copyright Eastwood Harris Pty Ltd 2022

154

EASTWOODHARRISPTY LTD.

### 10.3 - Adding, Editing and Deleting Dependencies

Dependencies may be added, edited or deleted using the following methods:

- Graphically add a relationship,
- Hold the Ctrl Key to select two or more tasks and then use the **Task, Schedule** group, **Link Task** function,
- The **Task, Schedule** group, **Unlink Task** function removes dependencies between selected tasks,
- Open the **Task Information** form by double-clicking on a task and selecting the **Predecessors** tab,
- Double-click on a Relationship line to open the **Task Dependency** form and edit or delete a dependency,
- Create a split window by right-clicking and selecting **Show Split** and then display the predecessors and successors in the bottom pane.

Page 155Copyright Eastwood Harris Pty Ltd 2022

155

EASTWOODHARRISPTY LTD.

### 10.4 - Formatting the Task Boxes

- Task Boxes may be formatted from the **Box Styles** form,
- This is displayed by selecting **Format, Format group, Box Styles**.

Page 156Copyright Eastwood Harris Pty Ltd 2022

156

EASTWOODHARRISPTY LTD.

### 10.5 - Formatting Individual Boxes

- Once highlighted, a **Task Box** may be formatted differently from all the others by:
  - Selecting **Format, Format group, Box** to open the **Format Box** form, or
  - Double-clicking on the outside edge of a box.

Page 157Copyright Eastwood Harris Pty Ltd 2022

157

EASTWOODHARRISPTY LTD.

### 10.6 - Formatting the Display and Relationship Lines

- Most formatting, except formatting the boxes, is set within the **Layout** form,
- Select **Format, Format group, Layout** to open the **Layout** form:

Page 158Copyright Eastwood Harris Pty Ltd 2022

158

EASTWOODHARRISPTY LTD.

### 14.2 Creating a New View

- A new **View** may be created by copying and editing an existing **View**, or creating a new **View**,
- There are two types of Views:
  - Single View**, and
  - Combination View** which specifies which View is displayed in the **Top Pane** and **View** is displayed **Bottom Pane**.
- The instructor will demonstrate how to create a new **View**.

Define New View

195

EASTWOODHARRISPTY LTD.

### 14.3 Details Form

- Details** forms are the third level of formatting that may be assigned **Bottom Pane** in some views,
- Each **Details** view has a number of options, which tends to make this aspect of Microsoft Project difficult for all levels of users,
- The **Details** forms may be selected in the bottom pane by right-clicking in the active pane to open a menu,
- The instructor will demonstrate examples of **Details** forms.

Name: Draft Bid Document

Duration: 3 days

☐ Effort driven

☐ Manually Scheduled

5	Bid Manager	1	\$1,200.00	\$1,200.00	\$0.00	\$1,200.00
7	Contract Consultant	1	\$1,000.00	\$1,000.00	\$0.00	\$1,000.00

196

EASTWOODHARRISPTY LTD.

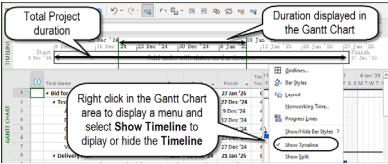

### 14.4 Timeline View

- The **Timeline View** allows you to clearly understand how much of the Gantt Chart is displayed on the screen,
- The **Timescale View** is shown above the **Gantt Chart** by selecting **View**, **Split View** group and checking the **Timeline** check box,
- A task may be added to the **Timeline View** by selecting the **Add to Timeline** found in many menus.

Total Project duration

Duration displayed in the Gantt Chart

Right click in the Gantt Chart area to display a menu and select Show Timeline to display or hide the Timeline

197

EASTWOODHARRISPTY LTD.

### Timeline View in Microsoft Project 2016

Microsoft Project 2016 introduced the ability to:

- Add multiple Timelines,
- Change the Start and Finish date of the Timeline and
- Format the Colors of each individual Timeline,
- The instructor will demonstrate.

198

EASTWOODHARRISPTY LTD.

### 14.5 A Logical Process for Developing a View

The following process is suggested for creating a new View;

- Collect the View requirements,
- Plan the naming/coding system to be used if there are a number of views to be created,
- Create any Custom fields required,
- Create the Table, Filter and Grouping to be used with the View,
- Create the View and assign the Table, Filter and Grouping,
- Create the print headers and page setup,
- Format the Timescale, Gridlines, Bars,
- Apply any special sorting or font formatting,
- Save the file,
- Copy the View to create all new Views with the Print settings and Gantt Chart formatting set as a standard in the first View.

199

EASTWOODHARRISPTY LTD.

### Module 14 - Views & Details - Summary

Topics

- Applying an Existing View
- Understanding Views
- Creating a New View
- Details Form
- Timeline View
- A Logical Process for Developing a View
- Workshop 12- Organizing Your Data Using Views and Tables.

200

EASTWOOD HARRIS PTY LTD.

Resource Optimizing

- At this point in the preparation of the schedule the resources should be reviewed and optimized to ensure that they are being:
  - Efficiently used, and
  - Sufficient resources are available,
- This chapter will briefly cover the following topics which will enable you to review your resources:
  - Resource Histograms
  - Resource Tables
  - S-Curves
  - Leveling.

Page 255

Copyright Eastwood Harris Pty Ltd 2022

255

EASTWOOD HARRIS PTY LTD.

19.1 Resource Graph View Displayed form the Assign Resources form

- Selecting **Graph** from the **Assign Resources** form will display the **Resource Graph** form in the Bottom Pane, as per the picture below and not produce a separate picture as in earlier version of Microsoft Project:

Page 256

256

EASTWOOD HARRIS PTY LTD.

19.2 Resource Graph View

- A Resource Graph may be displayed with the **Resource Graph** view,
- The **Resource Graph** may be viewed in the top or bottom pane and there are many options available by right clicking:

Page 257

257

EASTWOOD HARRIS PTY LTD.

19.3 Resource Tables

- Resource Tables** are displayed using either:
  - The **Task Usage** view, or
  - The **Resource Usage** view:

Page 258

258

EASTWOOD HARRIS PTY LTD.

19.4 Detailed Styles Form

- This form may be opened from the **Resource Usage** and **Task Usage** forms by right-clicking and selecting **Detailed Styles...**,
- This allows further options for formatting these views:

Page 259

259

EASTWOOD HARRIS PTY LTD.

19.5 Creating an S-Curve from Microsoft Project

- A single S-Curve for the current schedule and not the **Baseline** may be created graphically and displayed by Microsoft Project.

Page 260

260

EASTWOODHARRISPTY LTD.

### 20.6 Updating Resources

- There are many permutations available in the **File, Options** form for calculating resource data,
- Due to the number of resource options and numerous forms available in Microsoft Project, it is not feasible to document or teach all the combinations available,
- One or more resources may be applied to a task and you may want to enter both the **Actual Work** and the **Remaining Work** independently,
  - In this situation you will need to unlink **% Complete** and **Actual Work** with the **Updating task status updates resource status** option in the **File, Options, Schedule** tab,
  - Now the **% Work** field will still be linked to the **Work, Actual Work** and **Remaining Work** fields and will now operate independently of the **% Complete** field and not linked to the **% Complete** field .

Page 279Copyright Eastwood Harris Pty Ltd 2022

279

EASTWOODHARRISPTY LTD.

### Updating Resources (continued)

- You may want to enter both the **Actual Work** and **Actual Costs** separately,
- This process is very time consuming and requires significant organizational commitment to succeed,
- In this situation you will need in the **File, Options, Schedule** tab to:
  - Unlink **% Complete** and **Actual Work** with the **Updating task status updates resource status**,
  - Unlink the **Actual Work** and **Actual Costs** by disabling the **Actual costs are always calculated by Project** option, and
  - To ensure the **Actual Costs** are spread to the **Status Date** you should also check **Edits to total actual costs will be spread to the status date**. This option ensures **Actual Costs** are in the past and **Remaining Costs** are in the future.

Page 280Copyright Eastwood Harris Pty Ltd 2022

280

EASTWOODHARRISPTY LTD.

### Additional Updating Functions

Microsoft Project has two functions that may assist in updating a project:

- Update work as completed through:** (date)
  - When a project is updated using the **Update Project** form the project is updated as if it were progressing exactly according to plan and the **Status Date** is set to the same date as **Project Update Date** at 17:00hrs, and
- Reschedule uncompleted work to start after:** date
  - This function is used to move the **Incomplete Work** of **In-Progress** tasks into the future,
  - In-Progress** tasks must be able to **Split** for this function to operate. The option to split tasks is found on the **File, Options, Schedule** tab,
  - The **Status Date** is NOT set to the **Reschedule uncompleted work to start after:** date when this function is used.

Page 281

281

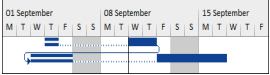

EASTWOODHARRISPTY LTD.

### 20.7 Splitting Tasks

When the **Split in-progress tasks** option is enabled, a task may be Split by:

- Dragging the incomplete portion of a task in the bar chart, or
- Clicking on the button and then moving your cursor over the point on the task bar where you want a split and dragging the task, or
- Using the **Project, Status** group, **Update Project, Reschedule uncompleted work to start after:** function, or
- Commencing a task before its predecessor finishes,

In the picture below the upper task was split using the **Split** button and the lower task was split because it commenced before its predecessor.

Page 282

282

EASTWOODHARRISPTY LTD.

### 20.8 Summary Tasks and Earned Value

- Actual Costs** and **Actual Work** may be summarized at any level in the same way as **Work** and **Costs**,
- The picture below is showing the **Earned Value** table and the costs have been summarized up to the Project Level,
- Note:** Check the way Microsoft Project calculates the Bid for Facility Extension task VAC:

Task Name	Planned Value - PV (BOWI)	Earned Value - EV (BOWI)	AC (ACWP)	SV	CV	AC	AC	AC
1 Bid for Facility Extension	\$7,440.00	\$9,558.00	\$10,000.00	\$1,118.00	-\$462.00	\$69,625.70	\$55,060.00	\$14,565.70
2 Technical Specification	\$7,440.00	\$9,558.00	\$10,000.00	\$1,118.00	-\$462.00	\$25,037.94	\$19,800.00	-\$5,237.94
3 Approval to Bid	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00
4 Determine Installat	\$6,720.00	\$6,720.00	\$7,000.00	\$0.00	-\$280.00	\$7,000.00	\$6,720.00	-\$280.00
5 Create Technical Sp	\$720.00	\$2,838.00	\$3,000.00	\$1,118.00	-\$162.00	\$21,717.17	\$8,600.00	-\$13,117.17
6 Identify Supplier Co	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$1,120.00	\$1,120.00	\$0.00
7 Validate Technical S	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$3,380.00	\$3,380.00	\$0.00
8 Delivery Plan	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$11,520.00	\$21,520.00	\$0.00
14 Bid Document	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$13,740.00	\$13,740.00	\$0.00

Page 283

283

EASTWOODHARRISPTY LTD.

### Summary Tasks and Earned Value (continued)

- The method that Microsoft Project uses to calculate the Earned Value data is documented in the Help file and should be read carefully, as different versions of Microsoft calculate these fields differently,
- Should different Earned Value calculations be required then Custom Data Fields should be considered as an alternative.

Page 284

284

EASTWOOD HARRIS PTY LTD.

### Module 20 – Updating Projects with Resources - Summary

Topics:

- Understanding Baseline Dates, Duration, Costs and Hours
- Understanding the Status Date
- Formatting the Status Date
- Information Required to Update a Resourced Schedule
- Updating Dates and Percentage Complete
- Updating Resources
- Additional Updating Functions
- Splitting Tasks
- Summary Tasks and Earned Value
- Workshop 18 - Updating a Resourced Schedule.

Page 285
