

Oracle Primavera P6 Relationship Comments

Oracle Primavera P6 released a **Relationship Comments** function with Version 20 which now allows users to add comments to a relationship.

These are useful to be able to add comments to a relationship to record for example why a relationship has been assigned or changed or what a lag or lead value represents.

This is a very useful function and in the past one had to either use a Note or a UDF assigned to either the predecessor or successor activity to record notes about a relationship.

A **Comments** column may be added to the **Activities** window **Relationships**, **Predecessor** and **Successor** tabs:

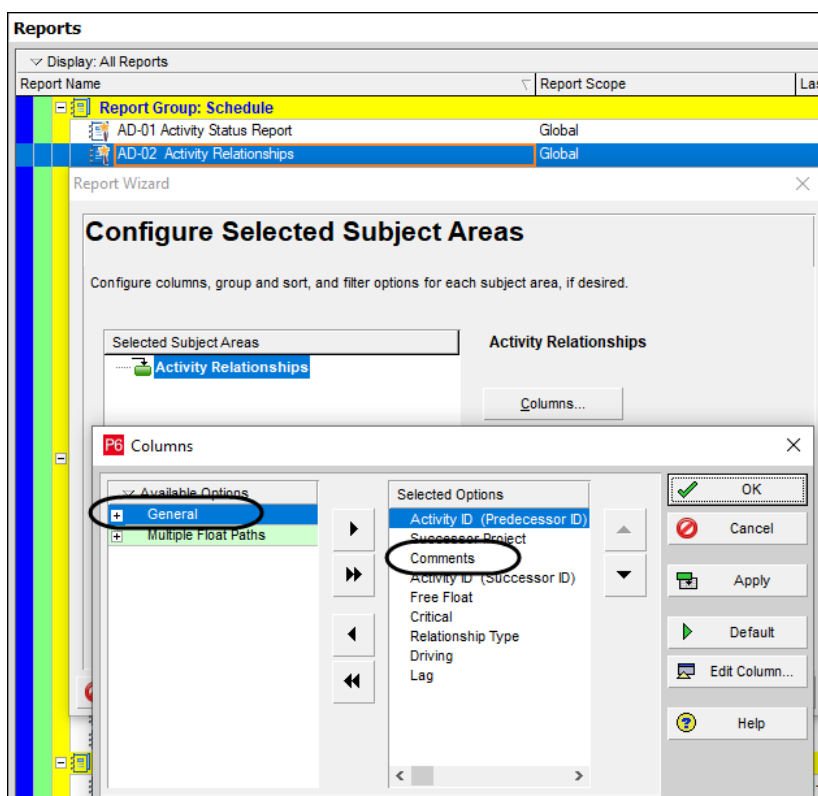

Relationships					
		Activity EC1490		Rough-In Phase Begins	
Predecessors					
Project ID	WBS	Activity ID	Comments	Activity Name	
EC00501	EC00501.Mech	EC1440	Lag to allow for slow delivery	Set Mechanical and Electrical Equipment	

The comment is seen in both the **Predecessor** and **Successor** window of each relationship assigned a comment:

Successors						
		Activity EC1440		Set Mechanical and Electrical Equipment		
Project ID	WBS	Activity ID	Activity Name	Comments	Relations	Lag
EC00501	EC00501.Mech	EC1500	Install HVAC Ducts		FS	0
EC00501	EC00501.Mech	EC1490	Rough-In Phase Begins	Lag to allow for slow delivery	FS	10

The Comments column is available in the Activity Relationship report:

Unfortunately, a **Relationship Comment** may not be displayed in an **Activity** window column and a user is forced back to using a UDF to display this information in Gantt chart printouts.

Accelerate your understanding of scheduling software to advance your scheduling career and be able to prepare better schedules with [Eastwood Harris books](#), training courses and online videos on the following software packages:

- Microsoft Project,
- Oracle Primavera P6 and
- Elecosoft (Asta) Powerproject

Online video training is available through Udemy through following these links:
